FIELD & BRUSH MOWERS

DR® Field & Brush Mowers lead the industry in power and performance. Each machine is built with innovative features and real-world tested to reliably conquer even the most overgrown fields quickly and efficiently year after year. With a full range of models available – including walk or tow-behind, commercial, and electric-battery-powered machines – you can be sure there's a DR® Field & Brush Mower for every property.

THEN

Introduced in 1989, the original DR® Field & Brush Mower was an affordable alternative to a tractor-mounted brush mower. Over the years, it has evolved into a versatile machine with all-season capabilities, and the lineup has expanded into several professional, commercial, and tow-behind models.

NOW

Today's Field & Brush Mower is miles ahead of where we started and miles ahead of the competition. With heavy-gauge steel frames crafted to withstand years of stress and strain, thick-walled plate steel decks, and hardened steel blades, DR® Field & Brush Mowers are strong enough to conquer anything you can throw at them.

COMMERCIAL XD SERIES

Intuitive Operation

puts total control right at your fingertips. Squeeze the hand lever for forward movement or push the thumb lever for reverse. The action is pressure-sensitive, so you set the speed.

Commercial Grade Power to Spare

because a commercial machine demands a no-nonsense commercial engine. Whether you go with the XD26 or XD30, you get a proven Kawasaki workhorse covered with a full 3-year commercial warranty.

Hand Guards

protect the operator's hands from brush, briars, and other obstacles.

Integrated Tie-downs

4 welded steel hooks (2 on each side) provide secure anchor points for transportation.

Solid Components

including levers and linkages for wheel drives made of solid metal (no cables). No stretching, snagging, or need to readjust.

Performance Features for Commercial Use

XD-Series machines are purposefully overbuilt for the rigors of continuous use and transport between job sites and are packed with the features you need to get the job done.

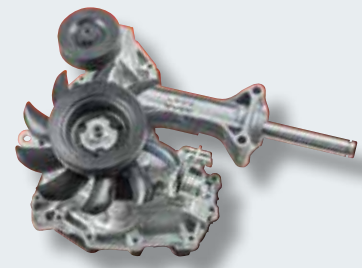

Custom Blade Spindle

Made of cast iron with oversized, sealed bearings for maintenance-free performance and durability and a Zerk fitting that allows the spindle to be greased above the deck.

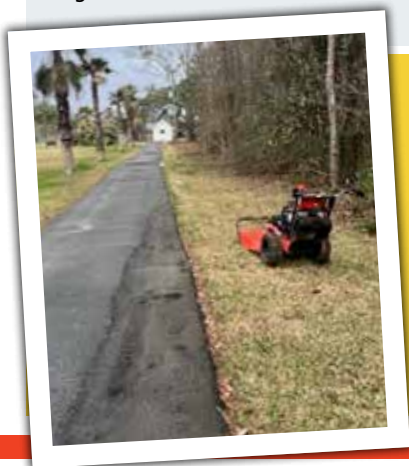

Tool-free Drain Hose

Removing oil is fast, neat, and easy. Work tool-free – just uncap and drain.

X-DRIVE Power Steering

Power steering is enabled by two independent hydrostatic wheel drives, DR's exclusive X-Drive provides a zero-degree turning radius and near effortless maneuverability.

A BEAST

It cut through multiple 3-inch saplings like butter turning them into wood chips. I ran the machine for about 2.5 Hours or one tank of gas. I was able to cut back the brush back about 5 to 15 feet from alongside my driveway. This job would have been a whole lot tougher without the hydrostatic drive.

– Shawn from Biloxi, MS
XD30 Owner Since 2023

PROFESSIONAL SERIES

Intuitive Controls at Your Fingertips

with all operating functions on the control panel or handgrips including; available electric start, operator presence, throttle, gear shift, blade engagement, and independent wheel brakes.

Commercial-Grade Electric Clutch

enables you to engage the blade instantly with the pull of a knob. Electrical "communication" means there are no cables or linkages to adjust or wear out.
(Not available on PREMIER model.)

Adjustable Handlebars and Power Steering

for a comfortable working height and the ability to quickly turn on a dime.
(Power Steering not available on PRO 26 10.5 HP model.)

Pivoting Deck

follows the contours of your land, providing a cleaner cut and reducing the chance of scalping.
(Not available on PREMIER model.)

Wide Cut

models available with 26", 30", or 34" wide mowing decks.

Hardened Steel Blades

that weigh up to 6 pounds and are a full 1/4" thick.
(Optional Extra Heavy-Duty Brush Blade available for sustained mowing in thick brush.)

Turn on a Dime

with hand-operated disc brakes that quickly pivot the machine around the locked wheel, navigating around obstacles or making 180-degree turns at the end of a pass.

Self-Propelled

gear-driven transmission lets you lock in your ground speed, leaving your hands free to steer the machine across uneven terrain. Choose from 3 forward speeds and 1 reverse to match your pace.

TOW-BEHIND

NEW

PRO MAX60T

Extra Large Gas Tank

on the PRO and PRO MAX models hold up to 2.5 gallons so that you can operate for up to 2.5 Hours without refueling.

4 Wheel Stability

makes the machine easier to move and maneuver during hookup and storage.

Floating Deck Extends Beyond the Wheel Path

so you can mow right next to hedgerows, fences, walls, and other obstacles without interference. The deck is suspended from the frame, allowing it to ride up and over high points, minimizing scalping and protecting the drivetrain from damage.

Chain Debris Guard

is similar to the debris shields used on commercial roadside mowers, this guard stops material from flying forward.

Adjustable Height Hitch

makes it easy to hook up to ATVs, UTVs, and lawn and garden tractors (minimum 14 HP and/or 400 lbs) with a pin hitch (PREMIER 44T, PRO 44T, and PRO XL44T) or ball-hitch (PRO MAX52T and PRO MAX60T), regardless of the height of the vehicle's hitch. You can connect directly to the shorter towbar when not offsetting the mower.

FANTASTIC BRUSH MOWER

I have had this mower for a year and a half. It's used on a regular basis with no issues. It's a beast size-wise, so I highly recommend using either your side-by-side or a beefier ATV. Love it!

– Robert from Dallas, TX
PRO MAX52T Owner Since 2023

Clear Brush While You Ride

DR® Tow-Behind Field & Brush Mowers have more innovative features and options than the competition. They're designed to clear acre after acre of overgrown grass, weeds, and brush while you ride in comfort.

Remote Control

Engage and disengage the mower blade and even adjust the cutting height between 4" and 7.5" — right from the seat of your tow vehicle.

*Not available on PREMIER 44T.
Height adjustment only on PRO MAX52T and PRO MAX60T.*

Dual Blade or Pivoting Blade Design

Superior mulching and cutting performance in the harshest conditions. The dual-blade on the PRO MAX60T features heavy-duty blade spindles to power through tough vegetation. Pivoting blades (all other models) swing away upon impact with immovable objects protecting the mower's blade, spindle, and engine.

Custom Blade Spindle

Designed exclusively for extra-heavy-duty applications, the blade spindle has a 1" thick steel shaft mounted on top and bottom with 30mm ball bearings for durability.

LAWN & GARDEN EDGER

PROFESSIONAL EDGES MADE EASY

The DR® Lawn & Garden Edger lets you take your yard to the next level by cutting perfect edges with precision and confidence. The DR®'s 4-wheel design is more stable and precise than ordinary 3-wheeled edgers.

Adjustable Cutting Depth

gives you 6 positions from 1/2" to 3" so you always have the perfect cut.

Pivoting Head

allows for beveled cuts around garden beds of +15-degree, Vertical, or -15-degree.

Curb Hop Feature

lets you make perfect cuts along curbs with one wheel at street level for added stability.

GREAT PRODUCT!

I have been extremely pleased with the performance of this edger. We have a long driveway and walkway to the river. What was a 2 hour job previously now takes 20-30 Minutes. Edger handles heavy overgrown areas easily. Quality product which I highly recommend.

A LOOK BACK DR[®] OWNER NEWS

APRIL 1993 - DECEMBER 2001

With a loyal owner base growing rapidly, DR[®] launched the DR[®] Owner News, a publication "By, For, and About DR[®] Owners," which is chock full of stories about living in the country.

THE DR[®] OWNER NEWS

COUNTRY HOME PRODUCTS[®], Ferry Road, Box 89, Charlotte, Vermont 05445
SPRING 1993

Spring Tips • Parts Order Forms • New Product Information • Letters and Photos from Owners

Dear DR[®] OWNER,

I'm delighted to announce the arrival of our newest DR[®] -- The DR[®] POWERWAGON[™]. Most of our customers live on or tend country property. So, if this is true for you, you are no stranger to the challenge of hauling rocks, firewood, gravel and all types of heavy loads.

There's also a good chance that you have a wheelbarrow, a two-wheeled yard and garden cart, and perhaps a tractor pull-behind cart as well. Each is fine, for its purpose. But for several years we've been working on a better, easier way to deal with moving practically any load around your yard and property..

Now...the first practical motorized hauler for property owners...The DR[®] POWERWAGON[™]!

There's never been anything like it!

Everyone who has seen or tried our first prototype models has been thrilled by their performance. Whether hauling firewood in from the back woodlot...or concrete blocks and other building materials to a remote building site...to carrying rocks uphill for a stone wall...to hauling nursery stock and soil around the yard and garden, the DR[®] POWERWAGON[™] is a dream come true!

HERE ARE A FEW OF THE KEY SPECIFICATIONS:

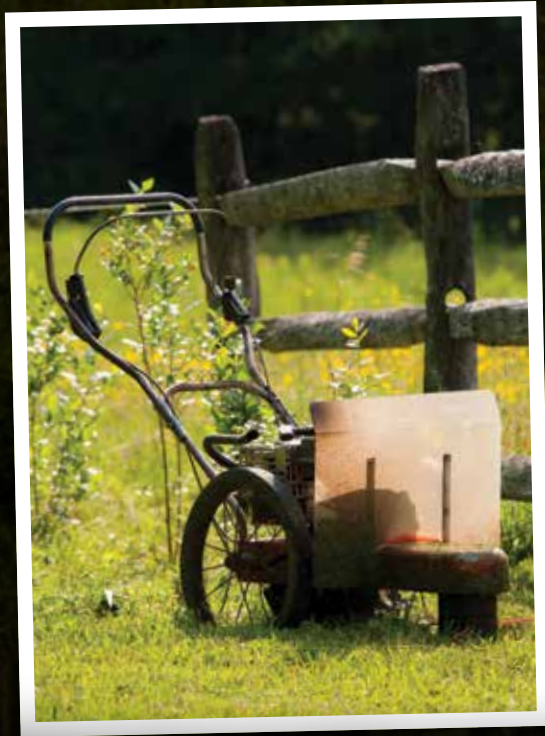

• 700 lbs. with never before ease!
• transaxle with BIG POWER-DRIVEN WHEELS mounted under the bed.
• heavier the load, the better the traction!
• a slow... a brisk trot, over flat terrain, uphill and down.
• out of close quarters and tricky
• while the powered

TRIMMER MOWERS

The one that started it all, the DR® Trimmer Mower, was originally designed as an alternative to cumbersome handheld trimmers but has grown into a powerhouse on wheels. DR® Trimmers can do everything from trimming around trees and fences to taking out knee-high grass and weeds. The full lineup of trimmer models features durable all-steel frames, adjustable handlebars, and oversized wheels for ultimate maneuverability. The offset frame design also trims outside the wheelbase, so you can easily trim anywhere. Choose from gas or battery-electric walk-behind models or trim from the comfort of your tractor or ATV with a versatile tow-behind model.

THEN

Two years after DR® Power Equipment got off the ground, our founders ushered in an all-new category in outdoor power equipment. The Revolutionary DR® Trimmer on Wheels combines the best features of a handheld trimmer and a bladed mower into an easy-to-use lawn machine. Today, more than 800,000 DR® Trimmers have been sold in the United States, making it America's #1 selling trimmer on wheels.

NOW

Today's DR® Trimmer Mowers have become versatile workhorses capable of trimming grass and weeds from building foundations and around trees to tow-behind models that cleanly trim around miles of fence line. No matter what size or type of property you have, there's a DR® Trimmer Mower that's perfect for you.

WALK-BEHIND

Trimmer Head Brake

stops the trimmer head from spinning by releasing the bail bar without stopping the engine — cutting down on how often you need to restart.

(Not available on the PILOT model.)

Easy Maintenance

The guard design contains flying debris and makes routine maintenance easy with improved access to all wearing parts.

22" Cutting Width

as wide as a standard push lawn mower — you need fewer passes to get the job done than with ordinary trimmers.

Lightweight Design

with mowers starting at just 55 lbs, DR® Trimmers are easy to maneuver without sacrificing strength.

Adjustable Handlebar

easily adjusts without tools to fit almost any operator.

All-Steel Offset Frame

is crafted of 14-gauge steel and offset to ensure that the cut reaches outside the wheel path, making it easy to trim up against fences and foundations. Frames are powder-coated frames to resist rust and corrosion.

Cast Aluminum Nose Plate

because collisions with trees, foundations, and other obstacles are inevitable.

(Not available on PULSE or PILOT models.)

Rugged Bearing Assembly

is cast entirely from lightweight, high-strength aluminum. The main Bearing Assembly has roller bearings at the top and bottom — to withstand the rigors of hundreds of Hours of heavy-duty trimming and mowing at over 3,000 rpm.

5X the Power and None of the Hassle!

The DR® Trimmer Mower's easy-rolling design makes it easy to maintain every corner of your property without straining your arms, neck, and back the way a heavy and awkward hand-held string trimmer can.

Our patented Mow-Ball™ follows the contours of the ground for a consistent cutting height, without scalping. Plus, you can adjust the cutting height instantly—without tools.

TRIMS...

The DR® TRIMMER MOWER rolls easily on two big wheels to trim precisely around flower beds, foundations, trees, and other obstacles without strain.

MOWS...

The DR® is the only trimmer on wheels that is guaranteed to mow tall, thick weeds without tangling.

EVEN CUTS BRUSH!

With the Beaver Blade® attachment, you can take down saplings up to 3" in diameter without bending over. *See page 20 for details.*

THIS MACHINE IS AWESOME

Goes through tall, thick weeds like butter! ;) Now our dog Benny has room to play!

– Fred from Silver City, NV
PREMIER Owner Since 2024

QUICK-LOCK CORD SYSTEM

Patented Quick-Lock™ Cord Attachment System

Offers 3 Benefits Unmatched by ANY Other Cord System:

- **Replace Cord in Seconds!** Makes changing cord in the field fast and easy!
- **Cord Won't Pull Out!** 1-way cam anchors the cord securely in place.
- **Accepts our 255 mil Serrated Cord** — the thickest, longest wearing cord in the industry.

Our DR® Cord is thicker and tougher than standard trimmer line, giving you more power to cut gnarly vegetation. In addition to being stronger, DR® cord lasts much longer than any other trimmer cord. Our great assortment of cord is available in a variety of bulk options, including:

Precut Lengths

The ultimate in convenience, cord is precut to the perfect length for all DR® Trimmer Mowers.

1 lb Rolls

Cut each length of cord as it's needed and save versus buying precut. Each roll includes 80' to 250' cord, depending on thickness.

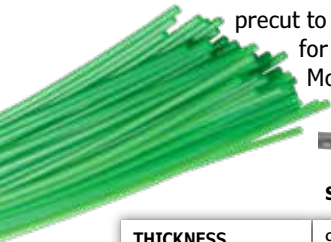

Jumbo Spools

Available on selected cord sizes, these spools offer the lowest possible "per foot" cost and up to 394' of cord.

QUICK LOCK™ TRIMMER HEAD KIT

Order for Gas Powered Walk-Behind models only. Comes standard with the Tow-Behind and 3-Point Hitch models.

Additional Accessories

DR® DURABLADES®

Slice through brambles and brush up to 3/8" thick! The kit includes a DuraBlade, Mow-Ball, and two sets of blades (6 total).

For Gas Powered Walk-Behind models only.

Kit - 313171

6-Pack Blades - 304401

BEAVER BLADE®

Slice through trees and saplings with real chainsaw teeth! It sharpens easily, fits all gas-powered walk-behind DR® Trimmer Mowers, and includes heavy-duty Aluminum Mow-Ball® Support and a sharpening file.

Attachment Kit - A0000146144

Replacement Blade - A0000146148

TOW-BEHIND

Up to 72" Offset Reach

depending on tow vehicle. The wide reach allows you to trim and mow up to four feet outside your wheelbase

Spring-Loaded Mowing Arm

lets you adjust the amount of resistance against your fence posts so you can cut back grass and weeds that can short out electric fences when wet.

Pivoting Deck and Anti-Scalping Wheel

offers easy height adjustment while the deck moves up and down to mow ditches and roadsides without scalping.

23" Diameter Steel Guard

rides around fence posts to cut within 1/2" of fence posts and other obstacles!

Protected Shaft Coupling

keeps PRO XLP's PTO connection free from debris.

CHIPPERS AND CHIPPER SHREDDERS

Engineered for the rigors of continuous wood chipping and shredding — hour after hour, year after year, we designed our dedicated Self-Feeding Chippers to process branches and other woody material up to 5.75" in diameter, and our Chipper Shredders can handle branches up to 5". Their powerful engines chew up the toughest wood and pulverize materials to a fraction of their original volume for easy disposal or use as a beneficial mulch around your property. The big, oversized hoppers allow you to process materials without the hassle of having to prune away side branches. Transporting your Chipper or Chipper Shredder to the woodlot and back is easy with our optional road tow package.

THEN

Billed as the "World's First Self-Feeding Chipper for Homeowners," the DR® Rapid Feed Chipper challenged the idea that only road crews can handle chipping large trees. With the Rapid Feed Chippers, DR® introduces a lineup of dedicated chippers that can reduce massive tree limbs to a pile of chips in just Minutes.

NOW

DR®'s full line of dedicated Chippers and Chipper Shredders capable of processing hardwood branches as large as 5.75" in diameter and loose woody materials from all around your property. Now homeowners can manage anything from backyard debris to managing a back woodlot with ease.

CHIPPERS

Large, Vertically Oriented Hopper

uses gravity to automatically feed material to the chipper knife. You can quickly process limbs up to 5.75" thick and with less fatigue than other chippers.

Powerful Air Channel

with air-injection venting draws material into the chipping chamber and ejects chips out the discharge chute.

High Discharge

shown with optional Extended Discharge Chute

Heavy Duty Chipping Knife

mounted to a massive flywheel (up to 62.5 lbs) takes up to 40 bites per second. The knife is precisely angled to "grab" material and draw it into the chipping chamber.

THIS IS THE TOOL I'VE BEEN SEARCHING FOR!

Started right up and tackled about 15 yards of built up lawn and yard debris so far without issue. Very powerful ... Grabs sticks and debris and devours in an instant. Large diameter branches are a bit slow with the chipper but most stuff goes in the shredder.

– James from Omena, MI
PRO XL520 Owner Since 2022

Accessories

DR® CHIPPER SHREDDER PIN HITCH KIT

Easily bolts onto the frame of the PRO 420 allowing you to tow your Chipper Shredder off-road with your ATV or tractor.

405250

ROAD TOW KIT FOR DR® CHIPPER SHREDDER

Make your PRO XL520 road-towable at speeds of up to 45 mph. The kit includes lights, fenders, wiring, a ball hitch, and a safety chain.

A0000210053

LEAF & LAWN VACUUMS

DR® Power's Leaf & Lawn Vacuums are #1 for a reason. Only our tow-behind Leaf & Lawn Vacs feature the most powerful engines and largest capacity collectors on the market. The unique clamshell or offset design makes them easy to empty completely with one hand. For smaller jobs, walk-behind models are a perfect fit. Both walk- and tow-behind models feature all-steel impellers, which shred leaves and other debris to a fraction of their original volume and are backed by a lifetime warranty.

THEN

DR® takes on what is likely the most universally hated, weekend-killing chore of them all—fall leaf raking. The DR® Leaf and Lawn Vacuum, designed to fit virtually any riding lawn mower, collects leaves while mowing and reduces them to a fine, compost-ready mulch.

NOW

The product line has expanded to meet the needs of customers with smaller lots with the introduction of the walk-behind leaf vac. New features like the EZ-Bagger system, which deposits materials directly into standard paper leaf bags ready for curbside pick-up, might make your leaf rake obsolete.

TOW-BEHIND

Easiest to Unload!

The “clamshell” design on the PREMIER 240, PRO 330, and PRO XL330 models allows you to lift the top collector and dump the trailer bed in one easy step — with one hand! “Power-assist” gas springs ensure a smooth, easy lift.

The precisely balanced collectors and steep 55-degree and 60-degree dump angles on the PILOT 200 and PRO MAX450 ensure they empty completely every time. And the

powered actuator on the PRO MAX450 handles dumping for you at the push of a button!

Maximum Suction Force

Larger engines and impellers combine to provide the highest vacuum power in the industry (as tested by a third-party laboratory) — an amazing 2,792 cubic feet per minute!

Virtually Clog-Free Operation

We spent hundreds of Hours testing different size hoses and found 8" optimal. Plus, our unique collector top design allows air to escape, preventing blockages.

Easily Converts to a Heavy-Duty Utility Trailer!

With the collector and engine/vacuum removed, the DR® doubles as a yard and garden trailer for your riding mower. The PILOT 200 and PRO MAX450 models feature a flatbed trailer and the PREMIER 240, PRO 330, and PRO XL330 have a molded cart.

Easy to Store!

The engine/impeller assembly has a built-in trolley that can be detached and rolled into storage. The collector top on the PREMIER 240, PRO 330, and PRO XL330 folds to about 5"-thick, making it easy to store almost anywhere.

NO OTHER LEAF VAC CAN COMPARE

Done right, engineered right, and the quality of workmanship is right. No other can compare. Why would you buy anything else. Very easy review to write. Great machine.

– Keith from Pigeon, MI
PREMIER 240 Owner Since 2014

Accessories

TRAILER JACK STAND

An easy-to-use hand crank allows you to easily make small height adjustments to align the tongue with your vehicle's hitch without awkward lifting.

*Standard on PRO 330, PRO XL330, and PRO MAX450 models.
342701*

MULCH DISCHARGE KIT

Use this handy Discharge Hose with our optional Vacuum Hose to blow collected materials into the woods, over fences, or into a container. It is perfect for any time you cannot simply dump materials from the Leaf and Lawn Vacuum.

282541

14' VACUUM HOSE

Reach up to 14' from your leaf vac to clean out corners, perennial beds, under fences, and any spots you can't reach from your tow vehicle. Optional hose picks up almost any organic debris — including pine cones, twigs, and nuts — from hard-to-reach spots.

351543

DUAL WHEEL KIT

This axle and wheel kit lets you convert the PILOT 200 or PREMIER 240 to a dual-wheel setup, which improves weight distribution and is easier on your lawn.

405371

DECK ADAPTERS

Adapt your lawn tractor's discharge chute to your Leaf and Lawn Vacuum's 8" hose. Call or visit online to determine which model is right for your mower.

*Standard – 351553
Angled – 351563*

34' VACUUM HOSE

Includes the standard 14' Vacuum Hose, a Coupler, and a 14' additional hose.

405351

WALK-BEHIND

EZ Bagger Leaf Collection System

lets you fill standard leaf bags so they are ready for curbside pickup. The platform holds the bag while the support ring provides a crimp bar for quick installation, and the latch keeps it secure.

Bag Caddy

included to carry 10 standard leaf bags. Add a second to carry 20 bags at a time.

Onboard Chipper

chews up branches up to 1.5" thick. Self-propelled model only.

Self-propelled model only.

3-in-1 Action

draws leaves in through the adjustable intake before feeding them into the impeller to be mulched and deposited into the leaf bag.

LAWN MOWERS

DR®'s professional quality battery-electric powered zero-turn mower means saying goodbye to the hassles of gas. No more oil changes or gas fumes. Just charge up and mow! You get the same great cut as a gas because all the power goes directly to the blade motors and enough power to mow 5 acres or more. For smaller lawns or tighter spaces DR® offers the new PRO MAX30 wide-area walk-behind mower with dual blade precision and 3-in-1 design that lets you mulch, bag, or side discharge grass clippings.

THEN

As the popularity of the zero-turn lawnmower grows in the U.S. lawn and garden market, DR® steps in with a Z-mower of its own — the DR® Converta Mower (later renamed DR® VersaMower) — a zero-turn mower that converts to a walk-behind mower with the flip of a lever.

NOW

Go electric with DR®'s first battery-electric zero-turn mower, powered by one, two, or three 2.5 kWh battery packs. Enough power to mow 5 acres without recharging and without gas!

ZT5E

Multi-Position, Foldable Rollover Protection System

Fold down for trimming under hard-to-reach places and trailering.

Available on 60" model only.

Comfort High-Back Suspension Seat

easily customizes to fit the operator's height (fore and aft adjustment) and weight (dial on seat front).

Hydro-Gear® Wheel Drives

feature a beltless drivetrain that uses brushless electric motors to provide precise zero-turn performance.

4.3" Interactive Touch Screen

controls blade and drive speed while displaying battery charge level, operation status, hour meter, and service notifications.

Quick-Lift, Foot Operated Deck Lift

15 height adjustments from 1.5" up to 5" in 1/4" increments.

Aircraft Aluminum Chassis and Deck

for a light yet strong machine that lets you get the most out of every charge.

Blade Drives

give you a dedicated brushless motor for all 3 mowing blades.

WORKS GREAT!

I have wanted one of these for years to mow my pasture. I've used my zero turn mower to mow my pasture and beat myself up and my mower up doing so. I bought this so I could tow behind my quad in the pasture as the quad will take the bumpy terrain much better than a mower with no suspension. This mower made mowing my 3 acre pasture a breeze and in record time. It is very powerful and cuts quickly and completely. Love it!

– Justin from Grants Pass, OR
PRO XL60TF Owner Since 2021

A LOOK BACK NEUTON MOWERS

LAUNCHED IN 2003

DR® Power Equipment's parent company, Country Home Products goes green with the launch of Neuton Power Equipment, primarily featuring the Neuton Battery Lawn Mower. Within a few years, the Neuton Mower becomes the darling of California's Clean Air lawn mower trade-in events, causing thousands of Californians to trade in their old gas machines for the new lightweight mower of the future.

WHAT'S NEXT?

DR® Power is excited to lead the way with the next generation of electric battery-powered mowers, in 2025. Building on the legacy of the Neuton and the patented technology pioneered by our partners at Mean Green Mowers, we guarantee you'll love what's next.

LOG SPLITTERS

THEN

DR® steps into the log splitter business, starting with a small electric benchtop model and, over time, designing a complete line of the world's fastest kinetic splitters — DR® RapidFire™ Log Splitters and most powerful hydraulic splitters.

NOW

DR®'s hydraulic wood splitters give you the power you need to split the hardest woods with the versatility to transform from a traditional horizontal splitter to a vertical machine capable of splitting the heaviest logs in your wood pile.

Rugged Hydraulic Pumps

generate up to 3,500 psi in the cylinders (up to 5"). Steel piston compression seals provide consistent power year after year.

24" Beam Height for Easy Loading

minimizes the lift from the ground to create a comfortable working height. Or rotate for verticle operation to split logs at ground level. Accepts logs up to 25" long.

Cast Iron Beam

provides rock-solid stability in either horizontal or vertical mode. Combined with a front foot that plants itself securely, you can count on secure operation — without the rocking you get with lightweight splitters.

16" DOT Approved Tires

let you tow these units anywhere — around your property or on public roads, at speeds up to 45 mph.

Quiet, Compact and Powerful

Plug the DR® PILOT 6TE into any standard household outlet (110 V), and you're ready to go. Then, just load a log, push a lever, and watch it split tough hardwood logs up to 10" in diameter and 20" long in seconds.

ROTOTILLERS

THEN

Aided by its founders' experience with Troybilt® tillers, DR® Power launched the first DR® Rototiller in 1996. This rugged walk-behind machine was a hit with home gardeners nationwide.

NOW

Today, DR® offers a full line of Rototillers including walk-behind and tow-behind models as well as small cultivators. Whether you want to break ground or keep weeds at bay, there's a DR® tiller for every garden and every gardener.

Powered Actuator

raises and lowers the wheels to regulate tilling depth. Actuator is powered by a 12 V, 17-amp battery (included) that automatically recharged by the engine.
PRO 36T only.

Bolo Tines

are forged of tough tempered steel and spin at over 230 rpm to dig up to 7.5" deep and mix soil completely.

Remote Control

allows you to make precise adjustments to your tilling depth without leaving your tow vehicle.

Powerful OHV Engines

are easy-starting and warranted for up to 2 years of residential use.
90-days in commercial use.

Power Driven Wheels

propel the tiller forward easily in almost any terrain. When you want to free-wheel, you can simply switch into neutral gear.

Dual Tine Rotation

gives you the ability to switch from forward- to counter-rotation depending on the job at hand.
PRO XLDRT only.

Drag Stake

provides extra resistance and can be raised and pinned in place when not needed.
PRO CRT and PRO XLDRT only.

Debris Shield

helps protect the operator from thrown soil.

POWER GRADERS

THEN

As every rural homeowner knows, living with potholes every spring is a car-battering battle. That is, until the introduction of the DR® Power Grader. Towed behind a riding mower or ATV, the DR® Power Grader loosens and redistributes existing material, saving hundreds on the cost of commercial grading and adding new gravel.

NOW

Today's DR® Power Graders offer the same great performance as the original with convenience features like EZ-Dial adjustment system or remote powered depth control that lets you easily match the depth to the hardness of your driveway.

1/4" Thick Reversible Leveling Blade

with an even edge for smoothing driveways and a toothed edge for fluffing the surface of riding rings or ball infields

EZ-Dial Adjustment System

allows you to precisely match your grading depth to the hardness of your driveway.

Universal Hitch

includes a height-adjustable ball or pin hitch that matches virtually any towing vehicle.

Tungsten/Carbide Scarifying Teeth

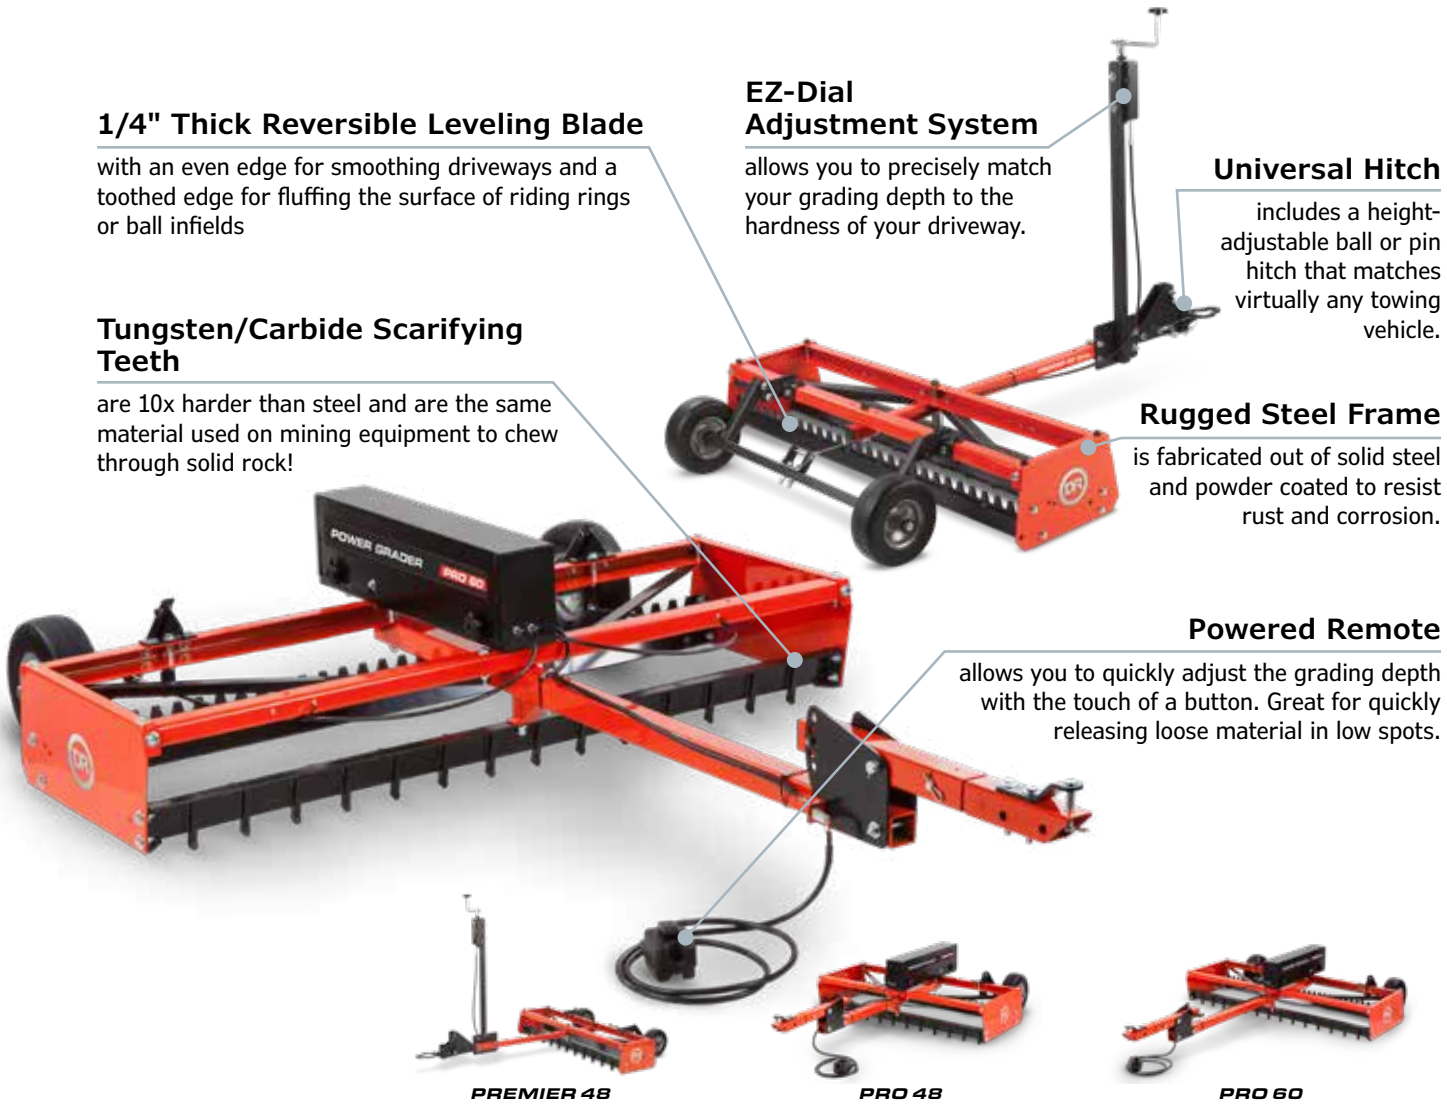

are 10x harder than steel and are the same material used on mining equipment to chew through solid rock!

Rugged Steel Frame

is fabricated out of solid steel and powder coated to resist rust and corrosion.

Powered Remote

allows you to quickly adjust the grading depth with the touch of a button. Great for quickly releasing loose material in low spots.

is easy-starting and features 6 forward speeds and 2 reverse speeds.

LED Headlights

illuminate your path for early morning or nighttime operation.

Plug-In Electric Start

uses a standard 3-prong extension cord and push a button to start! No battery or additional maintenance required. Recoil backup, with compression-release, makes for easy pull starts when you're away from a power source.

Heavy-Duty Steel Impeller

throws snow up to 45" away and backed by a LIFETIME warranty.
